The **University Of Azad Jammu and Kashmir, Muzaffarabad**

Department of Software Engineering

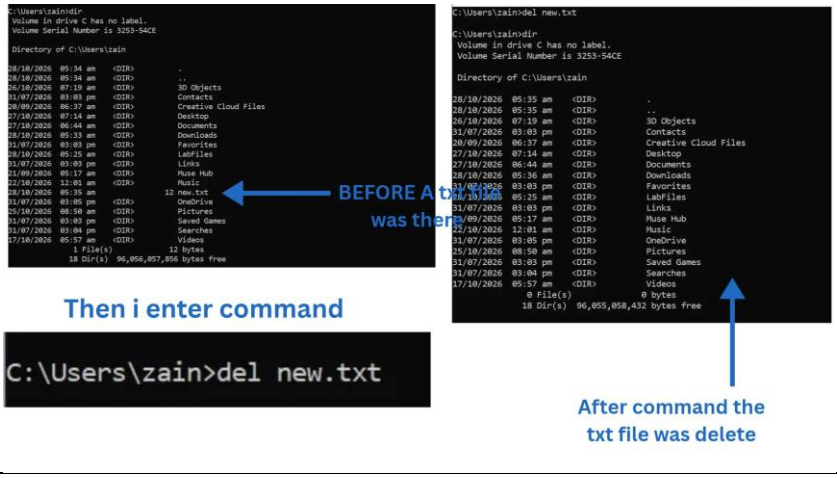

Student Name	**Muhamad Zain Mughal**
Roll Number	**2025-SE-03**
Program	**BS Software Engineering**
Course Title	**Operating Systems**
Course Code	**CSC – 533**
Course Instructor	**Engr. Seemab Khurshid**
Semester	**3rd**
Session	**2025–29**
Lab No	**03**
Lab Title	**Introduction to Operating Systems**
Due Date	**20-Oct-2026**

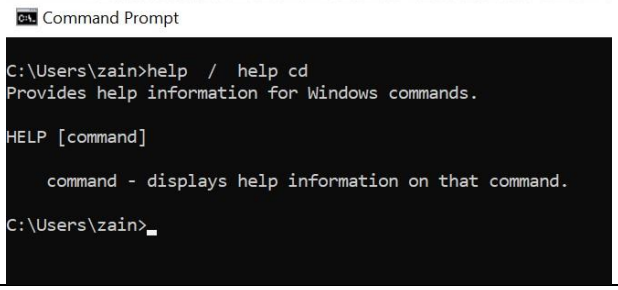

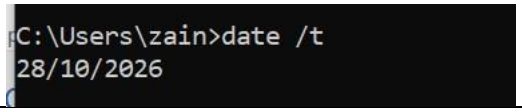

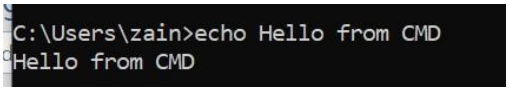

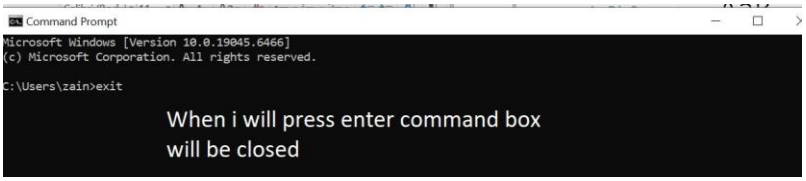

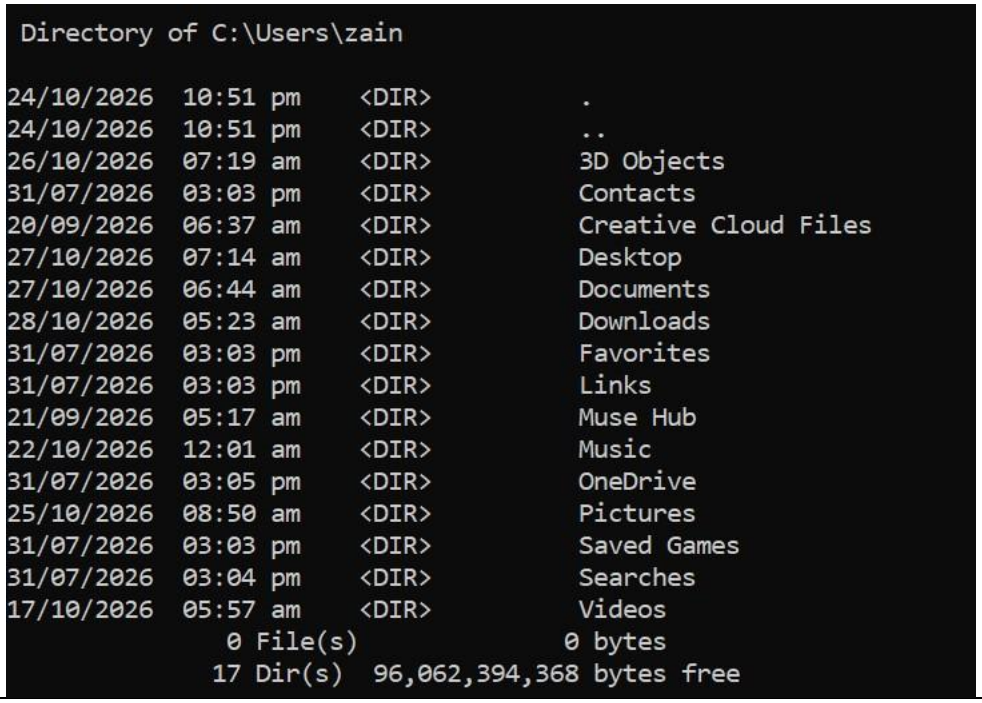

1. Objective

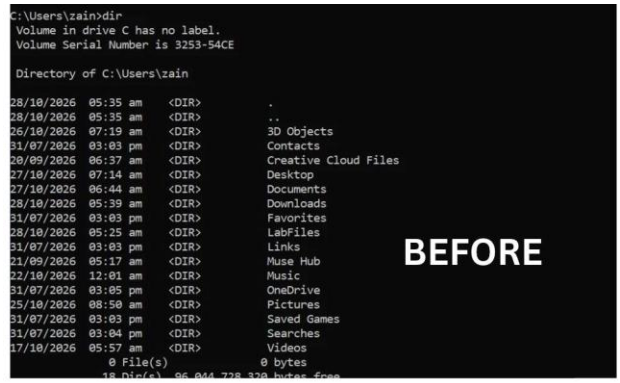

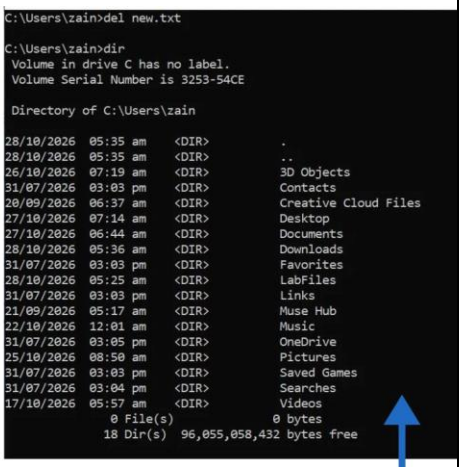

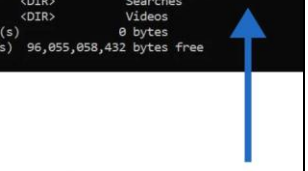

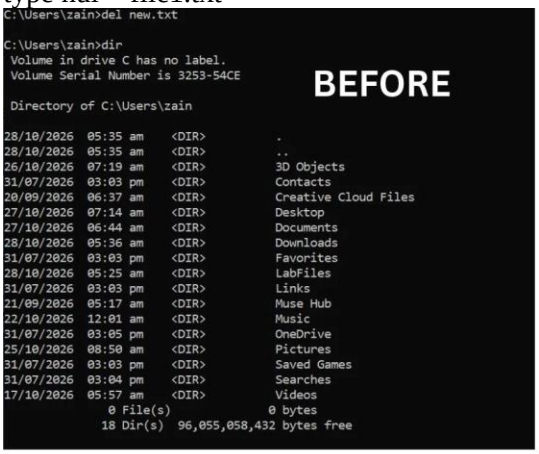

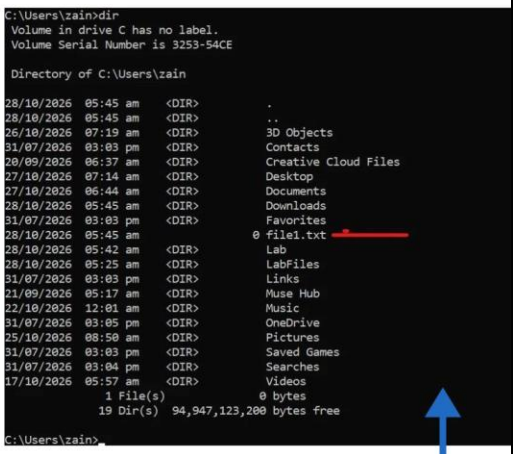

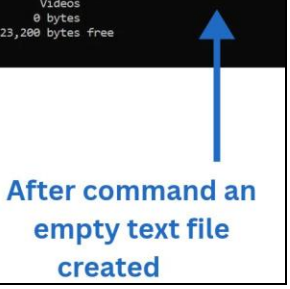

To develop proficiency in using DOS/Windows Command Prompt commands for basic system interaction and file and directory management.

2. Basic DOS Commands

The following table explains the commands named in the task. Commands should be typed in Windows Command Prompt (CMD).

Command	Purpose	Example
ASSOC	Displays or changes file-extension associations.	assoc .txt Command Prompt C:\Users\zain>assoc .txt .txt=txtfile
CD	Displays or changes the current directory.	cd C:\Users C:\Users\zain>cd C:\Users C:\Users>
WHOAMI	Displays the currently signed-in user.	whoami C:\Users\zain>whoami desktop-klnkjpt\zain C:\Users\zain>
CLS	Clears the Command Prompt screen.	cls C:\Users\zain>whomi 'whomi' is not recognized as an internal or external command, operable program or batch file. C:\Users\zain>cls C:\Users\zain>
DEL	Deletes one or more files. Use carefully; it does not normally send files to the Recycle Bin.	del test.txt 

HELP	Displays help for available CMD commands.	help / help cd 
DATE	Displays or sets the system date.	date /t 
ECHO	Displays a message or turns command echoing on/off.	echo Hello from CMD 
EXIT	Closes the Command Prompt window or exits the current CMD session.	exit 
DIR	Lists files and subdirectories.	dir 
MD / MKDIR	Creates a directory.	mkdir Lab

		   
TYPE NUL > file.txt	Creates an empty file if it does not already exist.	type nul > file1.txt    

Note: EXIT closes the current CMD session. To demonstrate it, save your work first. For DEL, create a disposable test file before running the command.

3. Create and Verify LabFiles

Step 1 — Open CMD: I press Windows + R, type cmd, and press Enter to open Command Prompt.

Step 2 — Create the directory: I type the following command and press Enter to create a directory named LabFiles on the C drive.

mkdir C:\LabFiles

```
C:\Users\zain>mkdir C:\LabFiles
```

Step 3 — Navigate to the directory: I type the following command and press Enter to change the current directory to C:\LabFiles.

cd /d C:\LabFiles

```
C:\Users\zain>cd /d C:\LabFiles\
```

Step 4 — Create file1.txt: I type the following command and press Enter to create an empty text file named file1.txt.

type nul > file1.txt

```
C:\LabFiles>type nul > file1.txttype nul > file1.txt
```

Step 5 — Create file2.txt: I type the following command and press Enter to create an empty text file named file2.txt.

type nul > file2.txt

```
C:\LabFiles>type nul > file2.txt
```

Step 6 — Create file3.txt: I type the following command and press Enter to create an empty text file named file3.txt.

type nul > file3.txt

```
C:\LabFiles>type nul > file3.txt
```

Step 7 — Verify the files: I type the following command and press Enter to display the contents of the current directory and verify that all three files have been created successfully.

dir

```
C:\LabFiles>dir
 Volume in drive C has no label.
 Volume Serial Number is 3253-54CE

 Directory of C:\LabFiles

28/10/2026  06:14 am    <DIR>          .
28/10/2026  06:14 am    <DIR>          ..
28/10/2026  06:14 am                 0 file1.txt
28/10/2026  06:14 am                 0 file2.txt
28/10/2026  06:14 am                 0 file3.txt
               3 File(s)              0 bytes
               2 Dir(s)  94,926,028,800 bytes free
```

Result: I successfully created the LabFiles directory and three empty text files (file1.txt, file2.txt, and file3.txt) using Windows Command Prompt. I verified their existence using the dir command.

7. Conclusion

This lab task demonstrates basic Windows Command Prompt usage and file/directory management. The MKDIR, CD, TYPE NUL, and DIR commands provide a simple workflow for creating a directory, entering it, creating files, and checking the results.
